

SILIKOMART DECLARATION RAW MATERIAL

We hereby certify that all the silicone moulds supplied to your company are manufactured in our company based in Mellaredo di Pianiga (Venice) - Italy, by using the same raw material (100% pure liquid platinum silicone type LSR) and same manufacturing process (injection process).

Please note that silicone rubber raw materials are able to resist temperatures from -60°C to 230°C under normal usage conditions.

We hereby declare that the above mentioned moulds comply to all relevant laws, with particular reference to:

- Regulation 1935/2004/EC on material and articles intended to come into contact with food;
- BfR Recommendation XV (Silicones);
- Arrêté du 25 novembre 1992 relatif aux matériaux et objets en élastomères de silicone mis ou destinés à être mis au contact des denrées, produits et boissons alimentaires;
- FDA 21 CFR 177.2600 on rubber articles intended for repeated use;
- ResAP (2004) 5 on silicones used for food contact applications.

Silikomart Srl also declares that the production cycle of the company pursues the GMP - Good Manufacturing Practices - mentioned in Regulation (EC) 2023/2006.

Moreover we hereby declare that in our production process are also used following plastic raw materials: Tritan, T-plus, T-plus X, PS and, together to all ours silicone moulds, we declare that they does not contains "Substance of Very High Concern" according to the Regulation 1907/2006/EC to more than 0,1 % (247 Substances SVHC-list updated to 21/01/2025) and are free of any organotins, Bisphenol A (BPA), Bisphenol S (BPS), Perfluorooctanoic Acid (PFOA), perfluoroalkyl substances (PFAS) and Polytetrafluoroethylene (PTFE).

In end we hereby declare that the material does not contain substances subject to Regulations (CE) N. 1333/2008 and (CE) N. 1334/2008 ("additives dual use") and non-intentionally added substances (NIAS) and respect guide lines of the Mineral Oil Ordinance about the migration of MOSH (mineral oil saturated hydrocarbons) and MOAH (mineral oil aromatic hydrocarbons) substances.
